connubia

Every home has stories of everyday life and extraordinary events, that follows from one to another and that nourish our memory and our emotions.

We live at our home environment with family, with friends. It is a place where we share our belongings with each other. Space where we are surrounded with people that share with us our joy and serenity.

For this reason, Connubia has chosen to enter your homes, where you can breathe your everyday life and embrace your daily habits.

We have looked into the way you live; we have followed your daily rhythm and we have created furniture that could add value to the time you spend at home.

This is our collection: bright, spontaneous, and colourful. It is up to you to discover it and bring it to life with your stories.

Daily stories

# About us

## Connubia: a story of passions and ties

Connubia is a brand of Calligaris Group, the Italian reality that has been able to evolve in its 100 years of history thanks to the ability to skillfully amalgamate craftsmanship and innovation.

What motivates us is to make products that meet the taste of people and unite them. Products that create value with a special attention to the well-being of our planet.

We do this by combining the knowledge and skills of our artisans, handed down over the years to promising young talents, with new technologies, new materials and innovative development techniques.

All the materials we use comply with strict standards where quality and sustainability are essential elements in every step of the design and production process.

This is why Connubia products are beautiful, functional and made to last.

introduction

Daily stories

# Our contribution to a sustainable future

«We do not immediately promise you 100% green in everything, but certainly 100% commitment and transparency to make our contribution to a sustainable future.»

Connubia is determined to make a difference on the issue of sustainability. The **I am Green** program aims to structure and organize corporate activities dedicated to this theme by acting on 2 fronts: on the Product, creating green furnishings, composed of natural and recycled materials and thinking about circularity, and on the Company system, for a sustainable approach to product development, production and distribution.

introduction

# What is Connubia

A concept that is already evident from the name, Connubia, which speaks of encounters and passions, of ties and affinities.

We like to live family and friends. We like to live every day like a new day, we like to create products to share, to keep forever.

Connubia is the young and contemporary brand of Calligaris, an Italian brand with design products that can tell our stories, because it is precisely from sitting together around a table that meetings, sharing and emotions are born and Connubia puts them at the center of its inspiration.

Connubia products have a simple, functional design, where color expresses vitality and personality. Products that want to be environmentally friendly using more and more eco-friendly materials with low environmental impact.

Not only chairs and tables, but also occasional furniture able to adapt to different contexts and create inspiring spaces for life, work and community.

# A REAL HOME, yours

The Connubia collection in  
the context of real homes... yours!

Here is your home!

It is not home of the architects, designers, polished advertisements,  
or home from television series.

We are talking about homes where we live every day, rooms often  
full of objects of everyday life, in which we eat, work, read, in short,  
we live our daily stories.

We have imagined a new photographic mood, a real experience  
inside the #Connubity, inserting the furniture of the new Connubia  
collection in the context of real homes... yours!

The home environment has been left unaltered, we do not want  
to interfere with it, your personal and authentic objects reflect  
ourselves, yourself.

Let's go in together.

finishing materials

# Connubia collection finishes

All our materials comply with the strictest quality standards. For your pleasure, we have sourced fabrics which are not only delightfully tactile and stain-resistant, but ones which hold their colour over time. Our ceramic tops are exceptionally hard-wearing, easy to clean and utterly hygienic. Our wood is protected with special varnishing processes which create an effective barrier against staining. In addition, Calligaris S.p.a. is FSC certified, meaning that it only uses wood that comes from well-managed forests in compliance with strict environmental, social and economic standards.

## WOOD TYPES

### SOLID WOOD

Obtained by cutting the tree log through a mechanic process. The aesthetic features and grain pattern depend on the wood essence. Solid wood is usually varnished (finishing process) and reproduces the typical essence shades.

---

### MELAMINE FINISHES – THERMAL STRUCTURED SURFACES

Obtained by gluing plain coloured or patterned sheets which are spread on the visible layer with melamine resins on a wooden grain panel (support). Melamine coated panels allow a great variety of aesthetic solutions, they are durable and have excellent stability and resistance to wear and tear.

## CERAMIC

### LAMINATED CERAMIC-GLASS

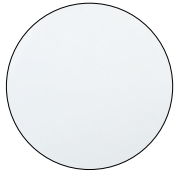

The ceramic-glass top is a self-holding product manufactured by coupling one ceramic plate (porcelain tile) to a tempered floating glass thanks to a special process carried out in autoclave. The ceramic plate thickness is 3 mm and is coupled with an 8 mm thick glass (for a total of 11 mm). The porcelain tile is a ceramic material obtained using a mixture of stoneware composed by clay and valuable raw materials, which are mixed, body tinted, compacted whilst high pressure is applied and finally fired at 1200 °C. The porcelain tile working surface features exceptional performances in terms of scratch, impact, stain, thermal shock and chemical resistance. It's easy to clean and very hygienic because it does not absorb liquids and does not release harmful substances.

## REGENERATED LEATHER

Regenerated leather is the result of the mixture of leather off-cuts (min 60%) and other natural materials. Regenerated leather is finished with the same procedure used for leather.

## SOFT LEATHER

The leather comes from the finest part of the European ox skin (the core) cut in different thicknesses depending on the requests and then tanned. The external finish is obtained by using water based colours.
